

LHC ANNOUNCES RENTAL WORKSHOPS

Flood Recovery Information Sessions To Be Held April 24 - May 1

The Louisiana Housing Corporation (LHC) will kick off Flood Recovery Rental Workshops next week starting Monday, April 24th and running through Monday, May 1st. The purpose of the workshops will be to give small landlord owners and developers of larger multifamily properties information about recovery programs designed to aid in the restoration and construction of properties impacted by the floods of 2016.

Representatives from LHC will be on hand to provide education and answer questions about the Neighborhood Landlord Rental Program, which covers new and existing rental properties consisting of properties with seven or less units, and the Multifamily Restoration Program, which covers existing properties with 20 or more units. Both programs are anticipated to launch in the coming weeks.
